URBAN PEST CONTROL EXPORTATION

Fast knock-down and high removal action

Active ingredient:

D-Cyphenothrin 0,20%, Imiprothrin 0,12% and Permethrin 0,20%.

Chemical group:

Pyrethroids

Formulation:

Aerosol

Action:

Contact and ingestion

Indication:

Control of spiders, cockroaches, ants, mosquitoes, bed bugs and fleas

Mode of use:

Shake before use. The product can be applied with the aid of manual applicators or through the packaging itself that comes with the extension tube. Press the valve, directing the spray over the insects and spiders and in the places used as shelter, such as crevices and cracks, in the folds of mattresses, cushions and sofas, behind furniture and refrigerators, in the drains, under sinks and in places where insects and spiders used to live and transit.

Packing:

Tin can of 600ml (Net weight 400g)
